DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to reducing wasteful power consumption by selectively executing one of a plurality of modes including a plurality of standby modes.

Group II, claim(s) 9-15, drawn to reducing wasteful power consumption by controlling the power save mode based on the state of the cover member.

Group III, claim(s) 16-25, drawn to enhancing user convenience by controlling the start waiting time of the switching unit based on the state of the cover member.

Group IV, claim(s) 26-35, drawn to reducing wasteful power consumption by selectively executing one of a plurality of modes and controlling the switching unit based on which mode exists during the mounting/dismounting of the process unit.

The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II, III, and IV use different means to solve different problems. For example, Groups I, II, and IV reduce wasteful power consumption (using different means) while Group III enhances user convenience using different means from Groups I, II, and IV.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
